St. Anthony’s has an Eco-Commission!

Lifestyle—We are being warned to keep our consumerism in control. The dictionary defines consumerism as “continual expansion of one’s wants and needs for goods and services.” This includes shopping for entertainment and buying things we really don’t need just because it is nice. Most all of us have probably done this. The Pope is asking us to step back and really think about what we are doing. Pope Francis reminds us that purchasing is always a moral and not simply an economic act. Our good deals are often the result of poorly paid overworked people. We are so fortunate to have so much while so many in the world barely have enough. Do we really need 20 tops and 15 pairs of jeans? We all know that buying more than we need is partly due to the media telling us we need to have what they are selling. Let’s try to tune out their voices and hear the cries of the needy. Take an inventory of what you have before you go out shopping just to buy another nice thing than you don’t need. You will probably be surprised that you already have more than you thought and may already have a nice new thing right in your closet!
